

### Christina's Personal Tips for Maturing Skin

- *Get a move on!* Aerobic exercise wards off wrinkles by helping blood circulate throughout the body and face and invigorating the skin.
- *Smile more!* Your face may adopt the expressions that you carry most of the time. If you frown more than you smile, your skin is more likely to develop lines or wrinkles at the corners of your mouth and between your eyes. A happy, smiling expression is great for your face and will help you look and feel younger.
- *Reduce or quit smoking.* Cigarettes reduce skin elasticity and the rate of healthy cell rejuvenation therefore causing skin to age prematurely. Nicotine is also a stimulant that can keep you up at night, leading to a tired mind and body, and robbing your skin of its much needed rejuvenating beauty sleep.

• *Lock in moisture.* Drink eight glasses of water each day to keep your skin moist and less wrinkle prone. Also be sure to moisturize your cleansed skin every day and night before applying makeup or sleeping.

• *Enjoy your days.* Find time for the small pleasures of life like music, meeting with friends and quality family time. But also make sure to take time out for yourself because internal personal serenity translates into a calmer, more youthful external appearance.
